## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 6-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Kahle.

Kahle discloses all of the subject matter as set forth in the claims and is substantially identical to the invention as broadly recited. Some of the claimed elements clearly disclosed by the reference are: A method and system for individually labeling a compact disk at the time the digital information is recorded. In regard to claim 9, the examiner submits that Kahle inherently does statistical comparative analysis in order for his invention to function.

### *Conclusion*

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to W. Fridie, Jr. whose telephone number is (703) 308-1866.
